MINIMAL FRAMES

# ADL

In 2004, Massimo Luca embarked on a visionary project that gave birth to ADL in Italy. With a strong commitment to sustainability in material selection, ADL aimed to design and manufacture fully-functional, aesthetically pleasing interior doors made of aluminum.

Drawing from his extensive design expertise and forward-thinking mindset, Luca's influence shaped the company's direction. ADL's focus shifted towards creating doors that went beyond mere furnishings, seamlessly integrating with and completing the room.

What sets ADL doors apart is their transformative nature. Instead of dividing spaces, they become gateways that subdivide while simultaneously connecting areas, thus creating what Ludwig Mies van der Rohe described as "flowing spaces."

In 2019, ADL joined the Boffi | De Padova Group, forming a strategic alliance that introduced a significant addition to their range of interior design solutions and facilitated further industrial expansion. This alliance strengthened ADL's position as a leader in the industry, combining their expertise with the renowned reputation of the Boffi | De Padova Group.

## ADL INTERIOR DOORS

# OFFICINA

The Officina collection proposes the unmistakable aesthetic of the Industrial style through the use of aluminum crosspieces applied with grid patterns on the glass plate and with a customizable shape.

Available in different versions — 5×3, 3×2, and 4×1 grids, giving you utmost flexibility in your designs.

Several configurations are possible, with or without a floor track, to meet different design needs.

**Overall Dimensions**

Width: 2500 mm  
Height: 2979 mm

**Materials and Finishes**

Frame: Nero (Black)  
Finish: Neutro Extrachiaro  
(Extra Clear Neutral)  
Opening: Sliding

**Other Opening Systems**

Sliding with track,  
Pocket Sliding, Swing,  
Bifold

# MITICA BOOK

The Mitica collection is characterised by its meticulous aesthetics — the slim aluminum profile that houses a central glass pane.

The geometry of the door frame is made with 18 mm wide uprights and 36 mm wide crosspieces.

The Bifold Opening System combines aesthetics with functionality to optimise the use of living space. Several configurations are possible, with or without a floor track, to meet different design needs. The door leaves also open up almost completely — taking up as little space as possible.

**Overall Dimensions**  
Width: 2500 mm  
Height: 3079 mm

**Materials and Finishes**  
Frame: Aluminum Bronzato (Bronzed Aluminium)  
Finish: Garage  
Opening: Bi-fold

**Other Opening Systems**  
Sliding, Sliding with Track,  
Pocket Sliding, Swing,  
Pivot Hinge

# LINE SLIDING

The Line collection features a door design that incorporates an aluminum frame with a central glass panel. Available in either Horizontal or Vertical line.

The unique aspect of this collection is the application of aluminum crosspieces on both sides of the glass. These crosspieces can be customised in terms of their position, direction, and pitch, offering flexibility to create various aesthetic configurations. This customization option allows the doors to cater to different stylistic and design requirements.

The Sliding Opening System bring together two environments that are designed to be one, delivering practicality thanks to the optimisation of space.

**Overall Dimensions**  
Width: 2500 mm  
Height: 3079 mm

**Materials and Finishes**  
Frame: Rovere Smoke (Smoked Oak)  
Finish: Fume (Smoke)  
Opening: Sliding

**Other Opening Systems**  
Sliding with Track,  
Pocket Sliding, Swing,  
Pivot Hinge

# MITICA PIVOT

The Mitica collection is characterised by its meticulous aesthetics — the slim aluminum profile that houses a central glass pane.

The geometry of the door frame is made with 18 mm wide uprights and 36 mm wide crosspieces.

The Pivot Hinge Opening System emphasizes the geometry and architecture of the partition system. The hinge of the pivot opening is integrated into the frame profile to highlight the clean lines of the frame.

The system integrated into the frame allows the door to open in both directions. It has an automatic stop when closed and features door stop when opened at 90 degrees.

**Overall Dimensions**

Width: 1504 mm  
Height: 3000 mm

**Materials and Finishes**

Frame: White Painted  
Finish: Neutro Extrachiaro (Extra-Clear Neutral)  
Opening: Pivot

**Other Opening Systems**

Sliding, Sliding with Track, Pocket Sliding, Swing, Bifold

# ALA

The ALA collection showcases doors with thick wooden leaves measuring 60 mm in thickness. These doors are designed to be seamlessly integrated into the walls of a house, creating a smooth and cohesive appearance.

This integration ensures that the doors blend harmoniously with the overall architectural design of the space.

**Overall Dimensions**

Width: 800 mm  
Height: 2593 mm

**Materials and Finishes**

Frame: Alluminio Naturale (Natural Aluminium)  
Finish: Noce Canaletto (Canaletto Walnut)  
Opening: Flush

**Other Opening Systems**

Pivot Hinge

# PIANA SWING

The Piana collection is characterised by a door with an aluminium frame enclosed between two pieces of glass. The effect obtained with this type of assembly gives the door a perfectly flat box-like appearance, making it suitable for the most sought-after environments.

**Overall Dimensions**  
Width: 800 mm  
Height: 2593 mm

**Materials and Finishes**  
Frame: Bronzo Chiaro (Light Bronze)  
Finish: Tortora & Specchio (Polished Tortora and Glass)  
Opening: Flush

**Other Opening Systems**  
Pivot Hinge

# STYLE

In the Style collection, the deep aluminium frame (60 mm) and the double glass plate are assembled with a 45° joint, creating a perfect union between the two materials. This construction detail gives the door a monolithic look that is ideal for an innovative and invisible flush opening system with great personality.

**Overall Dimensions**  
Width: 800 mm  
Height: 2593 mm

**Materials and Finishes**  
Frame: Aluminum Bronzato (Bronzed Aluminium)  
Finish: Reflex Chiaro (Reflex Clear)  
Opening: Flush

## MITICA SLIDING

The Mitica collection is characterised by its meticulous aesthetics — the slim aluminum profile that houses a central glass pane.

The geometry of the door frame is made with 18 mm wide uprights and 36 mm wide crosspieces.

### Overall Dimensions

Width: 1250 mm

Height: 2979 mm

### Materials and Finishes

Frame: Nero (Black)

Finish: Neutro Extrachiaro (Extra Clear Neutral)

Opening: Sliding

### Other Opening Systems

Sliding with Track, Pocket Sliding, Swing, Pivot Hinge, Bifold

## MATERICA

The Materica collection allows the creation of doors in which aluminium can accommodate multiple materials.

The result is a door that becomes an integral part of the architecture when inserted into a material wall, becoming a part of the same that opens onto the surrounding space.

### Overall Dimensions

Width: 830 mm

Height: 2987 mm

### Materials and Finishes

Frame: Nero (Black)

Finish: Gres Oxide Nero (Oxide Black Gres)

Opening: Flush

### Other Opening Systems

Pocket Sliding

# MIES SINGLE GLASS

The Mies collection has a minimal design that can divide and connect spaces. The transparency of the continuous glass wall gives life to environments where visibility and the passage of light are never limited. It is also an excellent element for sound insulation and is airtight.

## Overall Dimensions

### Front Side

Width: 5240 mm

Height: 2900 mm

### Left/Right Side

Width: 3844 mm

Height: 2900 mm

## Materials and Finishes

Frame: Nero (Black)

Finish: Neutro Extrachiaro  
(Extra Clear Neutral)

## ORAMA MINIMAL FRAMES

Orama Minimal Frames takes its name from the Greek word for Vision (=ὄραμα), reflecting their dedication to bringing every architect's vision to life. Their primary goal is to create the perfect frame solution for any architectural requirement, no matter how extreme or ambitious.

Established in 2013, Orama Minimal Frames has pioneered the revolution of space through unrivaled design and meticulous craftsmanship. Guided by a deep appreciation for minimalism, they specialize in seamlessly integrating frame systems into any space, transcending boundaries and redefining possibilities.

Drawing upon rich design expertise and unwavering attention to detail, Orama's founders envision minimal frames that embody exquisite aesthetics and exceptional functionality.

Their frames elevate partitions into architectural masterpieces, exuding elegance and sophistication. Crafted with precision and uncompromising quality, each frame showcases the artistry of their skilled artisans.

# ORAMA AND EXALCO EXTERIOR DOORS AND WINDOWS

ORAMA  
MINIMAL FRAMES

# ZERO SYSTEM OPEN-CORNER OUT

Orama ZERO merges the outside with the inside seamlessly. The windows slide over a 1 cm wide slot in the floor. The space between tracks is covered with the same flooring material, which creates a continuous space.

## Overall Dimensions

### 1 Pocket

Width: 1200 mm

Height: 3000 mm

### 3 Sliding

Width: 4500 mm

Height: 3000 mm

## Materials and Finishes

Frame: Black Structural

Opening: Pocket, Sliding

## Other Opening Systems:

Sliding Fix, Sliding Pivot, Sliding Sliding, Sliding Pocket, Double Sliding, Triple Sliding

# ZERO SYSTEM AXIS

Orama AXIS offers door that swings around an asymmetrically located axis, creating a short-lasting anti-gravity moment. AXIS gently opens with a simple and effortless push.

**Overall Dimensions**  
Width: 1616 mm  
Height: 3000 mm

**Materials and Finishes**  
Frame: Black Structural  
Opening: Pivot

# EXALCO 256 LIFT-AND-SLIDE SLIDING DOOR AND FREEDOM SCREEN

Our sliding systems provide thermal and sound insulation and also a superior level of wind and weather proof performance. It also comes with a screen to keep pests from entering the home when the doors are open.

**Overall Dimensions**  
**2 Sliding**  
Width: 3000 mm  
Height: 2937.4 mm

**Materials and Finishes**  
Frame: Black Structural  
Opening: Sliding

**Other Opening Systems**  
Sliding Fix, Sliding Sliding, Double Sliding, Triple Sliding, Open Corner

#### Materials and Finishes

Frame: Black Structural  
Opening: Pocket Sliding

#### Other Opening Systems

Sliding Fix, Sliding Pivot, Sliding  
Sliding, Double Sliding, Triple  
Sliding, Open Corner

## ONE SYSTEM POCKET DOOR WITH INTEGRATED MOTORIZED BLINDS

The Orama One is designed to provide an unparalleled level of frameless transparency in your living space. Its innovative fully concealed track system ensures a seamless and unobstructed view from floor to ceiling. What's more, this glass frame includes integrated motorized blinds, allowing you to effortlessly control the amount of light entering your home while maintaining privacy when desired.

## EXALCO 101 AWNING WINDOW

A system without a thermal barrier for windows and doors, which offers a wide variety of construction types. It offers a range of profiles and accessories that allow specific flexibility to achieve various aesthetics and functional requirements. It is designed with 3-level closure, with EPDM gaskets and a special water drainage system.

#### Overall Dimensions

Width: 900 mm  
Height: 1800 mm

#### Materials and Finishes

Frame: Black Structural  
Opening: Awning

#### Other Opening Systems

Projecting/Casement,  
Fixed Window

#### Overall Dimensions

Width: 900 mm

Height: 1800 mm

#### Materials and Finishes

Frame: Black Structural

Opening: Projecting/Casement

#### Other Opening Systems

Awning, Fixed Window

## EXALCO 101 PROJECTING WINDOW AND SCREEN

This system is a window and door solution without a thermal barrier. It offers various construction types and profiles, providing flexibility for different aesthetics and functional requirements. The system features a 3-level closure with EPDM gaskets and a water drainage system. It also includes a plisse screen to prevent insects from entering when the window is open.
